

2016 *SPE Thermoforming Quarterly* Author Membership Program

The SPE Thermoforming Division invites prospective authors to contribute articles to its award-winning publication, *SPE Thermoforming Quarterly*®. As part of our mission to facilitate the advancement of thermoforming, we seek to widen our audience and increase our knowledge base.

Starting in February 2016, the Division is offering a one-time, complimentary SPE professional membership to prospective authors who are not currently members of the Society of Plastics Engineers and who have not previously written for *Thermoforming Quarterly*.

Articles must be approved by the editor. Authors should strive for objectivity and data- or technology-driven articles that advance the understanding of thermoforming and related processes. Articles are typically 1,500-2,000 words in length. High-resolution images (300 dpi minimum) may be published with the article.

The magazine offers several major categories of articles:

- The Business of Thermoforming
- Industry Practice
- Lead Technical Articles
- Thermoforming & Sustainability

Future Magazine Publication Dates: April 15, July 15, November 1
